PANARIAgroup[®]

The beauty of feeling at home

Italian style that reveals nature's charm

Prestige reinterprets the timeless elegance of marble with a contemporary twist. The Panaria catalogue is thus expanded with a collection that focuses on the classicism of four marble looks with discreet graphic textures and warm, luminous shades, in two finishes (Lux and Soft). Reflecting a typically Italian sophisticated and advanced taste, Prestige embodies a style that faithfully reproduces the beauty of nature, enhanced by the proportions of the new 60x120 size.

Four mineral treasures that enchant with their exceptional realism

Unique details for timeless beauty

The four marbles are the result of a careful study of the examples taken as models. Every detail has been reproduced with an astonishing degree of accuracy, paying careful attention to the graphic balance of the many available facets. Veins, colour nuances, tonal transitions and glazes are evenly distributed on the laid surface, which renders the timeless beauty of a fine and pristine material.

The Lux surface conveys light transparencies with exquisite reflections

Style beyond the home: elegant and sophisticated commercial spaces

With Prestige, the noble beauty of marble and the charm of Italian style are not exclusive to the home. Thanks to the outstanding technical qualities of porcelain stoneware, the four marble looks are suitable for any light commercial context. Both the Lux finish, which is as shiny as polished marble, and the Soft finish, which is matt and soft to the touch, offer safe and durable floor and wall surfaces that are resistant to scratches and acids, non-absorbent and easy to clean. Prestige also incorporates Protect, the powerful antibacterial protection that is constantly active.

Travertino White Soft 24"x48" Rect - 60x120 cm Mosaic Travertino White Lux 12"x12" Rect - 30x30 cm

Marble looks inspired by the purest classicism, speaking the language of contemporary style

COLOURED-BODY PORCELAIN STONEWARE according to ANSI A137.1 (Unglazed Porcelain Tiles - P1 Class)

(**) Grout Joint Recommendations. Per TCNA Handbook, the minimum required joint width for ceramic tile and natural stone is 1/16"". Setting ceramic or stone without a grout joint of a least 1/16", often referred to as a butt joint, does not provide sufficient accommodation for dynamic building movement, differential thermal expansion, or allowable

INTENDED USE

KEY

Kitchens, bathrooms, living rooms and other residential environments.

Offices, offices open to the general public, waiting rooms, shops, public bathrooms, common apartment block areas, restaurant dining rooms, car showrooms, bars, cinemas, surgeries/clinics, hotel rooms and bathrooms. In areas subjected to forced traffic, or areas where chairs with hard plastic wheels are used, it is not advisable to use products with the LUX finishes.

Common areas of shopping centres, hotel foyers,

canteens, fast food restaurants, dance clubs,

airports, stations.

hospitals, schools, museums, places of worship,

Mainly for external areas that require flooring with anti-slip characteristics.

The LUX finishes are recommended, as well as for wall cladding, also for flooring in residential or light commercial areas that are not subjected to heavy traffic, where anti-slip characteristics are not required. The occasional presence of small inconsistencies or little spots on the surface is to be considered a characteristic of the material and of its unique production process. If the product is laid in direct contact with external environments, it is recommended to use protective solutions to reduce the formation of scratches. It is the installer's responsibility to protect the finished and clean tiling before the delivery to the client, by using appropriate protective materials (e.g. chipboard, cardboard sheets, etc.)

CERTIFICATIONS

BUREAU Certified by VERITAS

PANARIA CERAMICA is a member of the U.S. Green Building Council: this is an organisation that promotes buildings that are environmentally USGBC responsible, profitable and healthy places to live and work. LEED card PRESTIGE series is available on request.

Product designed in Italy and made in USA

PANARIA AND THE ENVIRONMENT

100% REUSE OF UNFIRED TILES

Crude waste generated by the process is reintegrated in the production cycle with no costs for the environment. This contributes to the safeguard of natural resources.

100% REUSE/RECYCLING OF THE INDUSTRIAL WASTE - FIRED TILES

The waste-fired tiles are fully reused in the production cycle. In addition, at the end of life, the tiles Panaria can be recycled as materials for substrates for roads and buildings, thus reducing the use of gravel and natural aggregates commonly used in building.

Ø

100% WATER RECYCLING

The water used in the production process is recycled. The water demand is strongly reduced by this mean.

PANARIA PACKING MATERIAL IS 100% RECYCLABLE

Carton boxes, plastic packaging materials, wooden pallets, straps, etc.

100% OF NON CERAMIC WASTE

s differentiated and recycled in other production cycles.

LOW EMISSIONS IN THE ATMOSPHERE

Panaria production plant strictly complies to US Standards with a very small amount of gas emissions in the atmosphere.

SAFETY REQUIREMENTS: NO FIRE REACTION

GREEN

Certified by UL Environment

SQUARED

METHANE CONSUMPTION IS HIGHLY REDUCED

By the use of up to date technologies and customized installations.
